

# Company Profile

From large-scale infrastructure construction to commercial developments, Civils 2000 has a history of delivering successful civil engineering and building projects. Civils 2000 draws on its extensive technical knowledge, critical resources and a wealth of specialised skills to provide engineering and construction services in road construction, water treatment facilities, pipelines, concrete structures, building construction as well as premium residential and commercial developments.

Civils 2000 is a proud accredited Level 1 BEE company, and has amongst its diverse shareholder base Unipalm Investment Holdings Limited (Unipalm), a broad based empowerment company (please refer to [www.unipalm.co.za](http://www.unipalm.co.za)).

Examples of our service offering is listed below.

## Civil Engineering

From large-scale infrastructure to commercial developments, the Civils 2000 Group has an impressive history of successful civil engineering projects. We draw on our extensive technical knowledge, critical resources and a wealth of specialised skills to provide engineering services in road construction, pipelines, dams and premium residential and commercial developments.

## Construction

With experience in the construction of industrial and residential projects such as multi-storey buildings, warehouses and bus depots, amongst others, Civils 2000 is equipped to oversee the construction and site management of small and large-scale building projects from start to finish.

## Road Surfacing

The pervasive use of asphalt in many areas of construction has created a need for a specialised focus on asphalt services. To this end, Roadsmart was established to service not only Civils 2000, but the industry at large. With specialised skills and equipment, Roadsmart provides asphalt and road surfacing services to several municipalities and civil contractors. We also offer road rehabilitation, including the reconstruction of damaged surfaces.

## Concrete Works

Our concrete construction experience spans across the crucial areas of water purification and treatment works, having constructed several major projects in this sector. Additionally, we provide both pedestrian and vehicular bridges, utilising both steel and concrete.

## Road Works

We are dedicated to achieving sustainable, long-term transport solutions by providing high-quality road surfacing and construction services to enhance South Africa's capacity for industry and continued economic growth.

## Renewable Energy

Civils 2000 is proud to be involved in the development and construction of renewable energy sites in South Africa. The country's vast wealth of wind and solar resources means that SA is perfectly positioned to provide power through wind farms and other forms of alternative energy. Through our involvement in this sector, Civils 2000 is a meaningful contributor to sustainable development and economic upliftment on a national scale.
